

Open Science Researchers: New Horizons

— putting the researcher at the center of Open Science
and taking a 'needs based approach'

Github: <http://linkme2.net/wz> version: #5e8b89d
Sources: <http://linkme2.net/wy>

The aim is to find replicable models of Open Science practice for use by the wider research community on a conceptual level and in practical applications.

RESEARCHERS:

NEW HORIZONS:

1. Researchers roles

How can Open Science benefit them

2. Research practices /
information literacy / incentives

New practices / improvements

3. Platforms / services – existing,
missing, or lost

NextGen services / new features

4. Institutions / resources /
infrastructures

Transformations to help researchers
